

MULTI HEAT EXCHANGER TRAINING SET

Multi Heat Exchanger Training Set is produced to teach operating logic of heat exchanger systems practically. The set is designed in accordance with the curriculums of universities, technical high schools and all institutions providing technical education. The content of the training set is suitable for both advanced and basic technical education. Equipments can be observed from every angle, making it possible to identify the equipments and observe the operating principles. The platform of the system is located on easy-to-move and lockable wheels. Entire panel is made of durable materials.

TRAINING SET

TRAINING SET EQUIPMENT

- Heating and circulation system
- Resistor
- Circulation pump
- Water temperature with adjustable resistor heater
- Heat exchangers and their qualities
- Heat exchanger input and output heat sensors
- Color touch screen
- Start/Stop/Emergency Stop buttons
- Residual current and circuit breaker protection
- Surface & pipe type heat exchanger
- Pipe-in-pipe type heat exchanger
- Fan coil type heat exchanger
- Plate heat exchanger
