

PVT TRAINING SET

The PVT (Photovoltaic Thermal) Training Set has been designed to familiarize the user with the definition of PVT and to perform practical applications. The training set is designed in accordance with the curricula of all institutions requiring technical education such as technical universities and technical high schools. The content of the training set is suitable for advanced technical training as well as basic training. The training set allows the user to observe the operation of the system and its processes. The platform on which the system is mounted, is equipped with locking casters which provide easy movement. The panel is made completely of durable metals.

TRAINING SET
