

# SOLAR SUMP PUMP

The Solar Sump Pump Training Set is designed in accordance with the curricula of all institutions requiring technical education such as technical universities and technical high schools. The content of the training set is suitable for advanced technical training as well as basic training. In the implementation set, user safety is prioritized in accordance with legal regulations. The panel is made of durable materials. Power supplies that have different output voltages and measuring instruments are mounted on the table. The panel is located on mobile casters.
